Date: June 16, 2020

Dear Parent,

Assalam o alaikum

Along with the lessons on Zoom App we are now introducing Google classroom from where students can download their worksheets and upload the work done by them.

For this purpose we are sending Student's email ID and password to parent's email address received via Survey Form. By using the provided ID and Password your child can easily access to Google classroom.

The work which students will solve in their copies will be submitted in PDF format using CamScanner mobile app which can save multiple images into a single PDF document.

For reference tutorials are available on school's website. The link is attached below.
